

Aspen Gold Premium Wood Pellet Bedding Provides Health, Rehabilitative Benefits for Horses

LADYSMITH, WI – (July 10, 2011) – Aspen Gold Premium Wood Pellet Bedding, released to market in June 2011, is manufactured by Indeck Ladysmith, LLC of Ladysmith, Wis. In addition to its many other advantages, the pelletized bedding product also provides significant health and rehabilitative benefits for horses.

Specifically formulated to keep horses healthy and comfortable, Aspen Gold Premium Wood Pellet Bedding provides superior cushion and support when compared to other equine bedding options, such as pine shavings.

“Horses who are suffering from laminitis or founder need additional cushion and support for their feet,” said Diane Logue, Tizmar Equine, Cannon Falls, Minn. “Aspen Gold completely cushions them, similar to sand. Shavings just don’t compare.”

Manufactured from 100 percent all-natural aspen wood, Aspen Gold Premium Wood Pellet Bedding also provides additional cushion and support for medically ill horses, horses recovering from any type of orthopedic surgery and horses that are engaged in intensive training programs.

“Unless they are piled one foot deep,” said Logue, “shavings just can’t offer the same comfort as Aspen Gold pellets.”

Highly absorbent Aspen Gold Premium Wood Pellet Bedding also causes liquid waste to clump together, allowing for easier clean-up. The unique properties of its aspen wood formula result in less bedding material being contaminated with waste and needing to be discarded during clean-up, causing manure piles grow at a slower pace.

For a limited time Aspen Gold Premium Wood Pellet Bedding is offering veterinary and equine hospitals two tons of its bedding product free, with a 20 ton order.

For information regarding Aspen Gold, how it can be purchased or how you can take advantage of the free product promotion, email info@aspengoldbedding.com or call (715) 532-3042.
